COMMENTS/QUESTIONS: _____

Providing us with this sheet fully filled out will help us give you the best service possible. Even if you have had a detailed conversation with us concerning your job, we talk to a lot of people and we may not fully recall your specific job.

Package your parts carefully! Use plenty of newspaper or other packing material for padding parts, and cardboard to separate them. Heads and cylinders should be wrapped individually, placed in individual boxes, then packaged together in a larger box with at least 2" of padding around them. Insure the boxes for replacement value.
